

Dynamic and results-driven Software Engineer with extensive experience developing and supporting high-quality technical solutions in enterprise IT environments, including the financial services industry. Skilled in **Java**, **Python**, and **JavaScript**, with strong expertise in **relational and NoSQL databases** such as **PostgreSQL** and **MongoDB**. Proven track record of optimizing workflows, automating processes, and integrating third-party applications to enhance operational efficiency and ensure data accuracy. Experienced in **Agile development methodologies**, collaborating with cross-functional teams, and participating in **Agile** ceremonies to deliver scalable, high-performing solutions.

AREAS OF EXPERTISE

- Web Development

- Database design

- Oracle NetSuite

- Agile Methodology

- OOP
- Data Structures

- AI Training

- CS fundamentals

- Shell Scripting

- Full Stack

PROFESSIONAL EXPERIENCE

AI Trainer Expert – Micro1 / Toronto, Ontario – Dec/2025 – current

- Evaluated and refined LLM outputs against strict rubrics, ensuring factual accuracy, self-containment, and precise alignment with evaluation criteria.
- Detected and corrected scope violations, ambiguity, and unsupported assumptions in model responses.
- Produced high-quality revisions and justifications that improved scoring reliability and regulatory consistency.
- Ranked among the **top 10 experts** by number of signed off tasks, reflecting consistent accuracy, throughput, and evaluator trust.

Software Engineer – Immiland Canada / Toronto, Ontario – Apr/2024 – current

- Acted as Technical Lead for multiple development initiatives, guiding architectural decisions, mentoring developers, and ensuring code quality and best practices across **JavaScript**, **Node.js**, and **TypeScript** projects.
- Engineered and maintained **Google Apps Script** solutions using **JavaScript** to automate business processes, eliminating repetitive tasks and improving operational productivity.
- Automated payroll systems by integrating the Bamboo **API** and Kajabi **Webhooks**, ensuring precise paycheck distribution aligned with employee work hours and reducing errors in payment processing.

Achievements

- Actively participated in the strategic adoption of new technologies, achieving a 30% improvement in data access speed and a **75% reduction in processes runtime**.
- Provided expertise in the research, design, and development of large-scale systems, improving their capabilities and performance, resulting in a **60% increase in operational efficiency**.
- Successfully automated key business processes and enhanced data visualization, contributing to a **55% increase in company productivity and sales**.

Software Engineer – INDRA Company / Bogotá, Colombia – Jun/2021 – Sep/2022

- Built robust **API services** for sending and receiving data.
- Researched and resolved issues regarding the integrity of data flow into **SQL and NoSQL** databases.
- Supported the integration of software components on **Linux** operating systems.
- Developed Python scripts for data processing and transformation, using regular expressions and JSON/XML parsing to extract, normalize, and structure data from heterogeneous sources.

Achievements

- Played a pivotal role in cross-functional collaboration, significantly reducing software defects and technical issues in the project, resulting in a **25% improvement in overall system stability**.
- Contributed expertise to the research, design, and development efforts of large-scale, enhancing the system's capabilities and performance, leading to a **20% increase in operational efficiency**.
- Spearheaded the strategic adoption of technologies, which resulted in a remarkable **30% improvement in data accessing speed and a 15% reduction in server downtime**.

EDUCATION

- Software Engineering Technician Diploma (With Honors) - Centennial College. Toronto, Ontario. Dec 2023
 - GPA: 3.9
- Computer System and Network Specialist Diploma (With Honors) – Evergreen College. Toronto, Ontario. Feb 2023.
 - GPA: 4.0
- Bachelor’s in Computer Engineering - Universidad Nacional de Colombia. Bogotá. Feb 2022.
 - GPA: 3.7
